SUMMARY

DevOps and platform engineer with 10+ years in IT.

My strength is finding out what is actually happening and working the solution, regardless of area, tool, complexity or size of the task.

That range comes from a career spanning the full width of technology operations, from network operations for global mining and ERP support to identity, security, cloud infrastructure, data platforms and internal product engineering.

The last twelve months, in numbers:

- Over $600k/year in cloud savings identified and delivered, using AI to build internal tools, systems and processes.
- Snowflake to BigQuery migration: 1.4 TB across 33 databases with no service interruption and ~35% lower compute cost; 30+ Tableau reports with 4,000+ Snowflake-specific SQL queries migrated.
- Salesforce Cases replaced by a support platform built in 13 days, now carrying 65,003 migrated tickets.
- Production Kubernetes bill cut by two-thirds, with zero incidents.

What the numbers do not show: I document what I build, teach the tools to whoever needs them, and leave every system easier to run than I found it. The growth of the team around me is part of the deliverable.

PROFESSIONAL EXPERIENCE

DevOps Engineer | Smarter Sorting
Jul 2025 - Present | Boulder, Colorado, US | Remote | Full-time

Own cloud infrastructure, the data platform and internal products at a compliance-AI SaaS company, as its only platform engineer.

- Led the company-wide Snowflake to BigQuery migration as its only engineer, coordinating the cutover with every data-owning team: 1.4 TB across 33 databases and 30+ customer-facing Tableau reports (4,000+ Snowflake-specific SQL queries), zero downtime, ~35% lower compute cost. Traced years of silently wrong data to the legacy ingestion pipeline and fixed it.
- Built the tooling that made the migration possible: a schema-aware Snowflake-to-BigQuery SQL translator, a one-click Tableau workbook converter and a schema browser covering 5,400+ tables.
- Built the in-house support platform that replaced Salesforce Cases in 13 days: email-to-ticket intake, public help center, knowledge base, RBAC and attachments. 65,003 tickets and 145,464 messages migrated, live before the Salesforce sunset.
- Led the Google Cloud cost program, identifying and delivering over $600k/year in savings. Diagnosed a BigQuery misconfiguration costing ~$38,000/month and validated the fix against the billing export (98.4% reduction).
- Cut both GKE clusters from $19,574/month: right-sized dozens of services, retired 38 dead services with owner sign-off, drained 9 of 18 production nodes one at a time, moved staging to Spot capacity on AMD and closed with a one-year committed-use agreement, all without downtime or incidents. Production bill down two-thirds; ~$160k/year saved.
- Replaced third-party data replication with in-house pipelines: a Python ETL on Cloud Run syncing 196 Salesforce objects daily, Stripe API ingestion into BigQuery, and Datastream change data capture across four environments.
- Shipped a multi-tenant file-sharing portal with a public REST API (built in two days after a retailer refused SFTP, Dropbox and Drive) and a service granting read-only database access without distributing credentials.
- Root-caused months of failed production restore tests to 5.5 TB of WAL held by two dead replication slots, completed the first successful restore (407 GB) and launched point-in-time recovery, automated restore tests and WAL alerts on every production instance.
- Replaced the manual biweekly security log review with a Cloud Run job that analyzes Cloud Armor, firewall, database and Auth0 logs and files its own Jira tickets.
- Resolved production data incidents for enterprise retail customers: restored a business-critical reporting dashboard within 5 hours; corrected hazardous-materials data feeding a national retailer's logistics system.
- Wrote the company standard for programmatic AI access, replacing static API keys with Workload Identity Federation. Added automated AI review of failed CI builds.

Skills: Google Cloud Platform, Kubernetes, Terraform, Cloud SQL, TypeScript, FinOps, CI/CD, Disaster recovery, Incident response, AI agents

IT Consultant | Pareto AI
Apr 2026 - Oct 2026 | Remote | Contract

IT lead for an AI data company with a corporate team and an external expert workforce of about 1,000 accounts across seven Google Workspace tenants. Reported to the Head of People and owned IT end to end: security, identity, devices, vendors and support.

- Advised leadership and the People, Legal, Procurement, Support, Trust and Safety and DevOps teams on IT decisions, writing the options and cost analyses behind endpoint management, laptop sourcing, MDM and SSO; advised on SOC 2 scope, AI coding tool licensing, employee monitoring, data sharing controls and the access standard for hybrid workers.
- Started with a baseline security audit of Google Workspace and Slack and turned the findings into the IT roadmap: 76 tracked actions and a 32-point due-diligence readiness checklist.
- Implemented 2-step verification on the corporate Google Workspace tenant and six external tenants, 1,000+ accounts in three phased waves, coordinating the rollout across teams; built a Slack tool, a support runbook and an identity-verified account recovery process so locked-out external users could be unblocked securely.
- Automated onboarding and offboarding with a Slack app connecting Ashby, Rippling, Linear and other platforms: hiring and termination events open linked IT tickets and notify the right channels without manual entry.
- Took over Apple Business Manager administration and reconnected it to Rippling MDM, so new company Macs enroll in device management automatically.
- Wrote the security improvement plan covering SOC 2, device management, policies and security awareness training, and provided the IT input for customer security reviews.
- Set up IT request and project tracking in Linear.
- Handled the day-to-day queue: around 90 access, account, mailbox and device requests across Google Workspace, Slack, Bitwarden, Zendesk, Dropbox, Coda, Linear and other platforms.

Skills: GAM, Google Apps Script, MFA, IAM, Identity lifecycle, Automation, AI agents, Vendor management

IT Operations Specialist | Smarter Sorting
Jan 2024 - Jan 2025 | Boulder, Colorado, US | Remote | Full-time

Built and ran the company's IT function as its only IT engineer.

- Ran frontline support and the full identity lifecycle for 100+ users across 30+ systems.
- Administered Okta SSO, Google Workspace, Jira Service Management and the device fleet on Jamf and SentinelOne. Integrated Okta with the HR platform and the company password manager, ending manual account provisioning.
- Defined the service-desk model and automated it in Jira: response and resolution targets by request type, escalation paths, ticket creation from Slack, and onboarding/offboarding workflows that record proof of account deactivation for audit.
- Supported the company's first SOC 2 Type 2 certification.
- Owned repository security and organization-wide Google Cloud IAM governance: enforced merge-blocking rules for unresolved security alerts across 16 repositories in two days; migrated 32 individual access grants to a group-based model.
- Replaced Finance's manual month-end reporting with a Stripe API integration, which also surfaced 1,496 records the manual process had been omitting.

Skills: Retool, Proofpoint, GitHub, Automation

PL/SQL Analyst | GB Agritech
Mar 2025 - Oct 2025 | Vitória, Espírito Santo, Brazil | Hybrid | Contract

Support for an ERP built on Oracle Forms.

- Requirements analysis and L3 support for escalated incidents.
- Analysis of Oracle database functions and routines in PL/SQL.
- Improved support processes; maintained agile workflows in Azure DevOps.

Skills: Incident response, ITSM

Senior IT Engineer | TheGuarantors
Apr 2025 - Jul 2025 | New York City, US | Remote | Full-time

Led the IT team.

- Owned user lifecycle, access control, automation and process documentation, building on the existing tooling rather than adding new platforms.
- Worked with Security, HR and Infrastructure to tighten security protocols and unblock critical operational issues.
- Optimized Okta, Jira, Google Workspace, Slack and Rippling; built API integrations in JavaScript, Bash and Python.

Skills: Team leadership, REST APIs

Internal IT Support | Trustly
Apr 2022 - Jan 2024 | Vitória, Espírito Santo, Brazil | On-site | Full-time

- Bilingual (Portuguese/English) technical support for users across every US time zone.
- Managed user requests, asset management, onboarding/offboarding and internal IT process improvements.
- Built automation for IT tasks that cut response times.
- Led improvements in inventory control, vendor relations and security policy rollout.

Skills: IT Service Management, User lifecycle, Okta, Google Workspace, GAM, Jamf, MDM, Apple devices, Jira, Vendor management

Software Support Analyst | Quality WebPosto
Mar 2021 - Apr 2022 | Vila Velha, Espírito Santo, Brazil | Hybrid | Full-time

- Ran incident response and turned requests into use cases for the development team.

- Administered PostgreSQL databases.
- Led the support team and trained new hires and interns.

Skills: Incident management, Team leadership, ERP, Training & mentoring

NOC Analyst | Algar Tech
Apr 2020 - Feb 2021 | Vitória, Espírito Santo, Brazil | Remote | Full-time

- Bilingual network analyst for VALE S/A, supporting operations in 27 countries.
- Mesh, LTE and radio networks, BGP, MPLS, DMVPN, Cisco, CA Spectrum, BMC Remedy.

Skills: NOC, ITIL, Incident management

Software Support Analyst | Prosystem
Oct 2017 - Apr 2020 | Vitória, Espírito Santo, Brazil | Hybrid | Full-time

- ERP support, incident management and customer service.
- Improvement requests and incident analysis for the development team.
- MySQL administration and Windows network support.

Skills: ITIL, Customer support, Windows networks

Service Desk Technician | Hsibrasil Soluções Corporativas em TI
Sep 2015 - Oct 2017 | Vila Velha, Espírito Santo, Brazil | On-site | Full-time

- Windows, networks, CCTV and IT operations support for corporate and individual clients.

Skills: Service desk, ITIL

Earlier experience
Head of Operations | Ronicar Tecnologia Automotiva | Dec 2012 - May 2015

IT Instructor | Prepara Cursos, Viaensino, Microcamp Tecnologia | May 2011 - Dec 2012

Technical Assistant | Automa Comércio e Serviços | Dec 2010 - Jul 2011

PROJECTS

Tibbis | CTO and co-founder | tibbis.com.br
Co-founder and CTO of a Brazilian marketplace for hiring local freelancers: PIX payment released when the job closes, identity verification with document OCR and face matching, real-time chat, disputes and ratings. Next.js, Supabase and Cloud Run, in production on Vercel.

Skills: TypeScript, PostgreSQL

Encontre um Terapeuta | Designer and developer | 2024 - 2025 | encontreumterapeuta.com
Therapist directory designed and built on WordPress with WooCommerce, Elementor and HivePress: location-based search, messages between patients and therapists, reviews, a blog, and online payments through Asaas (PIX, boleto and card) and Stripe. Another person manages the site today.

SKILLS

Cloud and infrastructure: Google Cloud Platform, Cloud Run, GKE / Kubernetes, Cloud SQL, IAM and Workload Identity Federation, Terraform, Helm, Docker, FinOps

Data: BigQuery, Snowflake, PostgreSQL, Oracle PL/SQL, MySQL, Datastream (CDC), ETL pipelines, Tableau

Languages and scripting: Python, SQL, Bash, JavaScript / TypeScript, PowerShell, REST APIs

CI/CD and observability: CircleCI, GitHub Actions, Datadog, Cloud Logging

AI engineering: Claude and coding agents, Vertex AI, Agentic workflow design, AI access governance (WIF over static keys)

Identity and security: Okta, Auth0, Google Workspace, Jamf, SentinelOne, SOC 2, Incident response

Service management: Jira Service Management, SLA design, Escalation processes, Technical documentation

EDUCATION

Coursework toward BSc Software Engineering | UNOPAR, Brazil | 2021 - 2024

AWARDS

3rd place, Google Cloud Data Analytics Mentor-Led Hackathon | Google Cloud | Dec 2025

Two-person team; built an automated per-customer cloud cost allocation engine in a three-week sprint with Google mentors.

LANGUAGES

Portuguese (Native), English (Fluent, professional working proficiency), Spanish (Basic)
